

Kennedy School COVID-19 related guidelines for when your child is not feeling well:

What if my child has a fever?

If your child has a fever, please make sure to keep him/her at home according to the fever policy. It is recommended by the CHP (Centre for Health Protection) and EDB (Education Bureau) that your child is seen by a doctor and checked/tested for any symptoms of COVID-19. Your child will need to stay at home for another 48 hours after the fever has returned to normal and has ceased using any fever reducing medication (as per normal Kennedy School fever policy).

What if my child has other symptoms?

As COVID-19 has shown a large range of different symptoms, in order to assure the health of all of our students, children with other symptoms of malaise (cold, profuse sneezing, profuse coughing, vomiting, diarrhoea, general malaise etc.) should be kept at home to be observed and checked by a doctor if the symptoms persist or if the child also develops a fever.

What if my child is sick and cannot come to school?

Please inform your child's class teacher and the nurse regarding your child's symptoms and seek medical advice from your doctor as needed. We have to monitor symptoms of illness for all absent students (as advised by the CHP).

What if my child or someone in our household/close contacts is confirmed with COVID-19?

Should your child or anyone in your household be confirmed with COVID-19, the school needs to be informed immediately by email to nurse@kennedy.edu.hk

For additional information regarding COVID-19, please see the Infectious Diseases section of the Nurse and Health Matters page on the school website [here](#).
